RE: 216 PATERSON PLANK ROAD SITE, CARLSTADT, NEW JERSEY  
IDW & SLUDGE TANK MANAGEMENT REPORT

Dear Mr. Gorin:

On behalf of the 216 Paterson Plank Road Cooperating PRP Group, we enclose four copies of the Investigation Derived Waste (IDW) and Sludge Tank Management Documentation Report for remediation work completed at the 216 Paterson Plank Road Superfund Site in Carlstadt, New Jersey. Three copies have also been provided to the New Jersey Department of Environmental Protection under separate cover.

The report documents the characterization and disposal of 400+ drums, containing IDW and other materials, and a 10,000 gallon tank remaining from Scientific Chemical Processing's former operation at the Site, containing hazardous sludge. The work was carried out in accordance with the Sampling and Analysis Plan approved by USEPA, and all disposal facilities were pre-approved by USEPA. Included in the report are Certificates of Destruction or Disposal for all hazardous materials.

If any questions arise during your review of the enclosed report, please do not hesitate to contact me.

Very truly yours,

GOLDER ASSOCIATES INC.

**1.0 INTRODUCTION**

On behalf of the 216 Paterson Plank Road Cooperating PRP Group (Group), Golder Associates Inc. (Golder Associates) submits this Investigation Derived Waste (IDW) and Sludge Tank Management Documentation Report (Report) for remediation work completed at the 216 Paterson Plank Road Superfund Site (Site) in Carlstadt, New Jersey. The purpose of the work was to appropriately characterize and dispose of 400+ drums containing IDW and other materials, and a 10,000 gallon tank remaining from Scientific Chemical Processing's former operation at the Site, containing hazardous sludge. The work was completed in accordance with the approved Sampling and Analysis Plan (SAP) submitted to the United States Environmental Protection Agency (USEPA) on April 17, 1997. A Health and Safety Plan (HASP) was submitted to the USEPA on April 17, 1997 and comments were received on May 16, 1997. A revised HASP addressing the USEPA's comments was submitted on June 3, 1997. USEPA was also advised in writing of the identity of all off-Site treatment and disposal facilities and concurred with their use.

This Report presents a brief summary of the work that was completed on-Site between July 1997 and February 1998, and provides detailed documentation of the waste materials manifested and disposed off-Site.

## 2.0 SITE BACKGROUND

The 6-acre Site is a former chemical recycling and waste processing facility which ceased operations in 1980, and is located in a light industrial/commercial area of Carlstadt, New Jersey. The location of the Site is shown on Figure 1. The property is bordered to the south by Paterson Plank Road, to the west by Gotham Parkway, to the east by a trucking company, and to the north by Peach Island Creek. The Site was placed on USEPA's National Priority List (NPL) in 1983.

The Site has been the subject of a number of investigations to determine the nature and extent of contamination on and off-Property beginning with the remedial investigation (RI) in 1986/1987. IDW was generated during the course of these investigations and has been stored in 55-gallon drums on-Site. The IDW stored on-Site included the following (refer to Figure 2 for locations):

- 55-gallon drums of unknown content located within and adjacent to Building B (Area 2), along with other labeled and unlabeled containers. The majority of these drums were believed to contain IDW material generated during the RI.
- 55-gallon drums of IDW generated during the Off-Property drilling investigation completed in July 1996 (Area 1). These drums consisted of drill cuttings/mud and used personnel protective equipment (PPE).
- Miscellaneous debris located behind Building A, between Building A and B and in Areas 1 and 2. The debris consisted of PPE, miscellaneous rubbish, and small containers.
- Sixteen 55-gallon drums of IDW generated during the sludge investigation conducted as part of the Focused Feasibility Study Investigation (FFSI) completed in August 1997, located between Buildings A and B.
- Seven 55-gallon drums of IDW generated during an extraction well redevelopment program completed in August 1997, located between Buildings A and B.

The 10,000-gallon tank, originating from the former site operations and containing contaminated sludge material, was located in the north-central area of the Site. As part of the Interim Remedy (see below) the tank had been staged in a roll-off container and covered with a tarpaulin. Building B (also a remnant of former Site operations) was in a severely dilapidated condition.

An Interim Remedy has been designed and implemented by the Group pursuant to an Administrative Order (Index No. II CERCLA - 00116) dated September 28, 1990. The Interim Remedy is illustrated in Figure 2 and consists of the following:

1. A lateral containment wall comprising a soil-bentonite slurry wall with an integral high density polyethylene (HDPE) vertical membrane which circumscribes the property;
2. A horizontal "infiltration barrier" consisting of high density polyethylene (HDPE) covering the property;
3. A sheet pile retaining wall along Peach Island Creek;
4. A groundwater extraction system for shallow groundwater consisting of 5 extraction wells screened in the fill which discharge to an above grade 10,000 gallon holding tank via an above grade header system; and
5. A chain link fence, which circumscribes the Site.

## 2.1 Scope of Work

The Scope of Work for IDW and Sludge Tank Management activities was completed in three phases:

### Phase 1: On-Site sampling for waste screening (Hazcat analysis and PCB screening)

This phase involved the following activities:

- Label, investigate drum markings, sample, and if necessary, restage each drum;
- Sample contents of the 10,000-gallon sludge tank and determine material quantity;
- Perform waste compatibility analysis; and,
- Segregate all miscellaneous debris.

### Phase 2: Off-Site disposal analysis and waste disposal planning

This phase involved the following activities:

- Segregate drum material into compatible bulk groups based on Hazcat and PCB screening results;
- Perform disposal analysis on composite samples for each bulk group; and,
- Prepare waste profile approval form (WPAF) for all disposal facilities and obtain approvals.

### Phase 3: On-Site management and load out of materials and off-Site transportation and disposal

This phase involved the following activities:

- Bulk and load materials;
- Remove and containerize contents of 10,000-gallon sludge tank;
- Demolish Building B;
- Clean, dismantle and dispose of 10,000-gallon sludge tank and associated roll-off container;
- Load out all miscellaneous debris;

- 
- Load out all building demolition materials;
  - Install new Site security fencing around Building B foundation; and,
  - Patch HDPE liner in area of former sludge tank.

All work was completed by OHM Remediation Services (OHM) of Trenton, New Jersey under contract to the Group and in accordance with the approved SAP. Health and safety protocols followed the HASP as revised to address USEPA comments. Golder Associates provided full-time oversight of the work on behalf of the Group. All hazcat, PCB screening, and waste disposal analyses were performed by the OHM laboratory located in Findlay, Ohio, which is certified by the State of New Jersey.

### 3.0 WASTE SCREENING AND WASTE DISPOSAL ANALYSIS

Waste screening testing (Hazcat and PCB screening) and waste disposal analysis was completed during the first two phases of the project. Phase 1 sampling commenced on July 7, 1997 and was completed on July 23, 1997. Sampling of the drums generated during the sludge investigation was completed on August 18. Hazcat analysis of the seven drums of IDW generated from well redevelopment was completed during Phase 3. During Phase 2, the drums were assigned to compatible bulk groups based on the Hazcat and PCB screening results. Composite samples of each bulk group were then tested for disposal analysis and the results formed the basis of waste approval forms submitted to disposal facilities for waste acceptance. A list of proposed disposal facilities was provided to the USEPA on November 6, 1997 and USEPA concurrence was provided prior to any off-Site disposal.

A total of 432 drums (D001 through D432) were logged and characterized on-Site as follows:

- 194 drums of unknown content that were located in and adjacent to Building B and consisting primarily of soil, PPE, and liquids (Drums D089 through D151, D153 through D184, D186 through D208, D211 through D276, and D285 through D294). The materials in these drums are believed to have been generated during the RI/FS;
- 156 drums associated with the Off-Property investigation completed in August 1996 consisting of drill cuttings/mud and PPE (Drums D037 through D088 and D306 through D409);
- 59 RCRA empty drums/5-gallon buckets (Drums D001 through D036, D152, D185, D209, D210, D277 through D284, D295 through D305);
- 16 drums associated with the sludge investigation completed in August 1997 consisting of drill cuttings/sludge material and decontamination water (Drums D410 through D425); and,
- 7 drums associated with the extraction well redevelopment program completed in August 1997 consisting of groundwater, DNAPL, and acid wash water (Drums D426 through D432).

A Drum Inventory Log, prepared by OHM, is presented in Appendix A.

### 3.1 Waste Screening

The following Hazcat and PCB screening testing was performed on drummed materials to establish compatible bulk groups:

- Hazcat analysis and PCB screening tests were completed on the materials in each of the 194 drums of unknown content. Separate analyses were carried out on each phase (solid/aqueous/liquid) present in each drum;
- Hazcat analysis and PCB screening test was completed on one composite of soil (representing four drums) and one composite of water (representing ten drums) associated with drums from the 1997 on-Site sludge investigation;
- Hazcat analysis was completed on the liquids in each drum generated during the well redevelopment program of August 1997 to assess compatibility with other waste streams. A PCB screening test was not performed since it has been previously determined that this material would be disposed of by incineration at a facility licensed to accept PCB wastes; and
- Screening of IDW from the 1996 Off-Property Investigation was limited as the materials were already known to be compatible and relatively uncontaminated (based on PID screening during the investigation). As a precaution, PCB screening of drums from wells MW-11D, RMW-13D, MW-14D, and MW-14R was carried out since Non-Aqueous Phase Liquid (NAPL) was observed during the drilling of these boreholes.

Since the sludge in the 10,000 gallon tank was not proposed for bulking with other materials, screening was not necessary and a sample was collected for disposal analysis only (sample ID #T001).

Table 1 includes a summary of the testing program and hazcat and PCB screening results are presented in Appendix B.

### 3.2 Bulking Scheme

Based on the screening results, the materials were bulked into seven groups, as detailed in Table 2, and summarized briefly below:

1. BG01 (Base Neutral Solids) – This bulk group was subdivided into three sub-groups (BG01A, BG01B, and BG01C).
  - Bulk Group BG01A included drums associated with the Off-Property investigation, which were generated from wells MW-11R, RMW-13D, MW-14D, and MW-14R. At each of these boring locations a NAPL material was encountered although the PCB

screening did not detect PCBs. However, due to the presence of a NAPL material, which was also associated with elevated PID readings, it was considered necessary to segregate these drums from the remaining drums associated with the Off-Property investigation because of the potential that the material would be classified as hazardous.

- Bulk Group BG01B comprised a subset of the 194 drums with unknown contents in which PCBs were not present. These drums were segregated into a separate group because the origin of the materials was not known and there was the potential that the materials would be classified as hazardous.
  - Bulk Group BG01C included the remaining drums associated with the Off-Property investigation. NAPL was not encountered at these locations (MW-8R, MW-10D, MW-10R, MW-15D, MW-16D, MW-17D, and MW-18D) nor were PID readings deviated.
2. BG02 (Water) – This bulk group comprised drums containing aqueous liquids which did not test positive for PCBs and in which the pH was greater than 2.
  3. BG03 (PCB Solids) – This bulk group comprised a subset of the 194 drums with unknown contents that tested positive for PCBs.
  4. BG04 (Chlorinated Acid Liquids) – This bulk group included a subset of the 194 drums with unknown contents which contained liquids with a pH less than 2. In addition, two drums with low pH associated with the well redevelopment program were also included in this bulk group.
  5. BG05 (PCB Organic Liquids) – This bulk group primarily included the material from the 10,000-gallon sludge tank. In addition, drums D128 and D141 were included based on flammability.
  6. BG06 (Base Neutral Liquids with PCBs) – This bulk group included a subset of the 194 drums of unknown contents with liquids which tested positive for PCBs and had a pH greater than 7. In addition, five drums associated with the well redevelopment program were also included in this bulk group.
  7. BG07 – This group comprised all RCRA empty drums logged on-Site.

Additional waste streams identified on-Site comprised:

1. Lab Pack Items – This group included all pails or containers less than 5-gallons in volume that were located in Building A. Each container was segregated according to the chemical class identified on the container.
2. Sludge Tank Metal Debris (PCB contaminated material) – The 10,000-gallon sludge tank and associated roll-off container were dismantled and segregated as a separate waste stream.
3. General Site Trash – Materials included board lumber, cardboard boxes and rubbish, unused plastic hose and geosynthetic material scraps, vegetation, concrete blocks, bricks, and unused tyvek and boots.

4. Construction and Demolition Debris - This material comprised debris derived from the demolition of the above ground portion of Building B. The floor slab of the building, which is in direct contact with soil, remains on-Site.

### 3.3 Waste Disposal Analysis

Disposal analyses were completed on a composite sample of the material from each bulk group. The analytical testing completed on each bulk group is shown in Table 3. The results are presented in Appendix C along with the associated Waste Profile Sheets provided to disposal facilities.

Based on the analytical results, bulk groups BG01A and BG01C were classified as non-hazardous and bulk groups BG01B (cadmium), BG03 (PCB solids), BG04 (Chlorinated acid liquids), and BG05 (PCB organic liquids) were classified as hazardous materials. Although bulk group BG06 (Base Neutral liquids with PCBs) was not classified as hazardous, this material was disposed of at a hazardous waste incinerator due to the presence of PCBs.

The lab pack items and sludge tank metal debris were disposed of as hazardous waste, and Building B demolition debris was disposed of as non-hazardous construction and demolition debris (C&D).

#### 4.0 TRANSPORTATION & DISPOSAL

The final phase of the project began on January 26, 1998 and was completed on February 27, 1998 and included the following activities:

- Non-hazardous material in bulk groups BG01A and BG01C were bulked into lined roll-off containers;
- Hazardous soils in bulk group BG01B were bulked into lined roll-off containers;
- Material in the 10,000-gallon sludge tank was transferred to 55-gallon metal drums. The tank was cleaned by thorough brushing and demolished;
- All materials associated with the remaining bulk groups and miscellaneous debris were loaded out;
- Building B was demolished, C&D materials were placed into a roll-off container for disposal, and a site security perimeter fence was installed around the foundation of the former building; and,
- The HDPE cover was patched where the 10,000-gallon sludge tank has been located and in other areas where minor repairs were necessary (e.g., locations of sludge investigation borings).

Based on the disposal analyses and subsequent acceptance from each disposal facility, the materials from each bulk group were sent to the following disposal facilities:

- BG01A and BG01C were classified as non-hazardous and were sent to the Hackensack Meadowlands Development Commission Landfill (HMDC) in North Arlington, New Jersey;
- BG01B was classified as hazardous (cadmium) and was sent to Chemical Waste Management Model City Facility located in Model City, New York (Model City Facility);
- BG02 (water) was transferred to the 10,000 gallon leachate holding tank after filtering to remove visible sediment. The tank contents are regularly disposed as multi-source leachate (F039) and treated at the DuPont Chambers Works Facility, Deepwater, New Jersey.
- BG03, BG04, and BG05 were classified as hazardous and were sent to Laidlaw Environmental Services, Deer Park Facility located in Deer Park, Texas (Deer Park Facility) for incineration;
- BG06, although not classified as hazardous, was sent to the Deer Park Facility for incineration due to the presence of PCBs;
- Lab Pack Items were sent to the Deer Park Facility for incineration;

- Sludge tank metal debris was sent to the Model City Facility;
- Building B C&D material was sent to HMDC; and
- General Site trash was sent to a local transfer station for disposal at a Subtitle D non-hazardous landfill.

Disposal documentation is provided in the following appendices:

- Appendix D: Waste Approval Acceptance letters;
- Appendix E: Hazardous Waste Manifests;
- Appendix F: Certificates of Destruction (BG01B, BG03 through BG07);
- Appendix G: HMDC's Statement of Services; and
- Appendix H: General Site Trash Disposal Documentation.

Following bulking of drum contents into roll-offs (Bulk Groups BG01A, B, and C and BG02) all empty drums were rendered useless and steam cleaned prior to recycling of the metal at Patrick J. Kelly Drums Inc., of Camden, New Jersey. Certificates of Destruction for the drum materials are provided in Appendix F.

Prior to the demolition of Building B, a construction permit application and associated documentation was submitted on February 11, 1998 to the Borough of Carlstadt. This permit equivalency was submitted to comply with the substantive local requirements although, in accordance with 40 CFR300.400(e)(1), it was not necessary to secure a permit. A copy of the associated documentation is presented in Appendix I.

## 5.0 HEALTH AND SAFETY

The health and safety procedures specified in the HASP were followed during the course of this project. During the first phase of the project, field personnel handling and sampling the unknown drums completed the work in Level B personnel protective equipment, and work associated with the drums from the Off-Property investigation was completed in modified Level D protection. During the third phase of the project, all work within the exclusion zone (EZ) associated with the 10,000-gallon sludge tank was completed in Level B protection. Prior to opening the sludge tank, combustible gas measurements were taken and all readings indicated that conditions within the tank were acceptable to gain entry by cutting open the tank. However, as a precaution, the tank was purged with dry ice and nitrogen prior to cutting with a gasoline powered demolition saw. Perimeter air monitoring, using a photoionization detector (PID), did not detect any concentrations above background within 10 feet of the tank or along the perimeter of the Site in a downwind direction during all work associated with the tank. Therefore, all personnel outside the exclusion zone (10 feet and beyond from the perimeter of the tank) completed work in modified Level D protection. Personnel handling materials during bulking of drums associated with bulk group BG01B (cadmium soil) completed the work in Level C protection to avoid the potential for fugitive dust inhalation. All other work was completed in modified Level D protection.

DRUM INVENTORY LOG

Drum No : D000198  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : KEVIN P. STOLT

Date: 7/16/97

Project Contact : Steve Petty/PM

Sampler : KEVIN P. STOLT

Time : 10:00:59

Phone : 609-588-6329

Weather : SUNNY, HOT

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

DRUM INVENTORY LOG

Drum No : D000204  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : KEVIN P. STOLT

Date: 7/16/97

Project Contact : Steve Petty/PM

Sampler : KEVIN P. STOLT

Time : 16:53:11

Phone : 609-588-6329

Weather : SUNNY, HOT

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  10  35  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

Over Packed  Yes  No OverPack Type:  Fiber  Steel  Poly OverPack Size:  110  95  90  85  85

DRUM INVENTORY  
LOG

Drum No : D000218  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : KEVIN P. STOLT

Date: 7/17/97

Project Contact : Steve Petty/PM

Sampler : KEVIN P. STOLT

Time : 08:15:46

Phone : 609-588-6329

Weather : SUNNY, HOT

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

Over Packed  Yes  No OverPack Type:  Fiber  Steel  Poly OverPack Size:  110  95  90  85  85

DRUM INVENTORY  
LOG

Drum No : D000263  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : KEVIN P. STOLT

Date: 7/17/97

Project Contact : Steve Petty/PM

Sampler : KEVIN P. STOLT

Time : 09:34:52

Phone : 609-588-6329

Weather : SUNNY, HOT

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

DRUM INVENTORY  
LOG

Drum No : D000272  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : KEVIN P. STOLT

Date: 7/17/97

Project Contact : Steve Petty/PM

Sampler : KEVIN P. STOLT

Time : 10:44:27

Phone : 609-588-6329

Weather : SUNNY, HOT

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

Over Packed  Yes  No OverPack Type:  Fiber  Steel  Poly OverPack Size:  110  95  90  85  55

DRUM INVENTORY LOG

Drum No : D000326  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : R KENYON

Date: 7/23/97

Project Contact : Steve Petty/PM

Sampler : RKENYON

Time : 08:05:56

Phone : 609-588-6329

Weather : Sunny 90

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

Over Packed  Yes  No OverPack Type:  Fiber  Steel  Poly OverPack Size:  110  95  90  85  55

DRUM INVENTORY LOG

Drum No : D000409  
Project Number : 19663

Project Location : 216 Paterson Plank Rd

Logger : R KENYON

Date: 7/23/97

Project Contact : Steve Petty/PM

Sampler : RKENYON

Time : 11:14:07

Phone : 609-588-6329

Weather : Sunny 90

Drum Type:  Fiber  Poly-Lined  Steel  Poly  Stainless Steel  Nickel

Lid Type:  Ringtop  Closed Top

Drum Condition:  Meet DOT Spec.  Good  Fair  Poor

Drum Size:  110  85  55  42  30  16  10  5 Other Size : 55.00

Drum Contents:  Full  3/4  1/2  1/4  < 1/4  Empty

Over Packed  Yes  No OverPack Type:  Fiber  Steel  Poly OverPack Size:  110  95  90  85  55

**C. Generator's Certification (Please check appropriate responses, sign, and date below.)**

1. Is this a USEPA hazardous waste (40 CFR Part 261)? If the answer is no, skip to 2.....  YES  NO  
a. If yes, identify ALL USEPA listed and characteristic waste code numbers (D, F, K, P, U) D006
- b. If a characteristic hazardous waste, do underlying hazardous constituents (UHCs) apply? (if yes, list in Section B.1.j).....  YES  NO ft  
c. Does this waste contain debris? (if yes, list size and type in Chemical Composition - B.1.).....  YES  NO
2. Is this a state hazardous waste?.....  YES  NO  
Identify ALL state hazardous waste codes \_\_\_\_\_
3. Is the waste from a CERCLA (40 CFR 300, Appendix B) or state mandated clean-up?.....  YES  NO  
If yes, attach Record of Decision (ROD), 104/106 or 122 order or court order that governs site clean-up activity. For state mandated clean-up, provide relevant documentation.
4. Does the waste represented by this waste profile sheet contain radioactive material, or is disposal regulated by the Nuclear Regulatory Commission?.....  YES  NO
5. Does the waste represented by this waste profile sheet contain concentrations of Polychlorinated Biphenyls (PCBs) regulated by 40 CFR 761? (if yes, list in Chemical Composition - B.1.j).....  YES  NO  
a. If yes, were the PCBs imported into the U.S.?.....  YES  NO
6. Do the waste profile sheet and all attachments contain true and accurate descriptions of the waste material, and has all relevant information within the possession of the Generator regarding known or suspected hazards pertaining to the waste been disclosed to the Contractor?.....  YES  NO
7. Will all changes which occur in the character of the waste be identified by the Generator and disclosed to the Contractor prior to providing the waste to the Contractor?.....  YES  NO

Check here if a Certificate of Destruction or Disposal is required.

Any sample submitted is representative as defined in 40 CFR 261 - Appendix I or by using an equivalent method. I authorize WMI to obtain a sample from any waste shipment for purposes of recertification. If this certification is made by a broker, the undersigned signs as authorized agent of the generator and has confirmed the information contained in this Profile Sheet from information provided by the generator and additional information as it has determined to be reasonably necessary. If approved for management, Contractor has all the necessary permits and licenses for the waste that has been characterized and identified by this approved profile.

**I. GENERATOR CERTIFICATION**

The undersigned generator is indicating that the generator has read the Rollins Radiological Acceptance Criteria on the instruction page to this waste data sheet; that wastes not meeting the Radiological Acceptance Criteria will be rejected by Rollins; and that all incoming wastes sent to Rollins will be subjected to a radiological survey prior to acceptance. I hereby certify and warrant that the information supplied on this form and on any attachments or supplements represents a complete and accurate identification and description by the generator company of this waste material, its constituents, and its known or suspected hazards.

## I. GENERATOR CERTIFICATION

The undersigned generator is indicating that the generator has read the Rollins Radiological Acceptance Criteria on the instruction page to this waste data sheet; that wastes not meeting the Radiological Acceptance Criteria will be rejected by Rollins; and that all incoming wastes sent to Rollins will be subjected to a radiological survey prior to acceptance. I hereby certify and warrant that the information supplied on this form and on any attachments or supplements represents a complete and accurate identification and description by the generator company of this waste material, its constituents, and its known or suspected hazards.

**I. GENERATOR CERTIFICATION**

The undersigned generator is indicating that the generator has read the Rollins Radiological Acceptance Criteria on the instruction page to this waste data sheet; that wastes not meeting the Radiological Acceptance Criteria will be rejected by Rollins; and that all incoming wastes sent to Rollins will be subjected to a radiological survey prior to acceptance. I hereby certify and warrant that the information supplied on this form and on any attachments or supplements represents a complete and accurate identification and description by the generator company of this waste material, its constituents, and its known or suspected hazards.

**I. GENERATOR CERTIFICATION**

The undersigned generator is indicating that the generator has read the Rollins Radiological Acceptance Criteria on the instruction page to this waste data sheet; that wastes not meeting the Radiological Acceptance Criteria will be rejected by Rollins; and that all incoming wastes sent to Rollins will be subjected to a radiological survey prior to acceptance. I hereby certify and warrant that the information supplied on this form and on any attachments or supplements represents a complete and accurate identification and description by the generator company of this waste material, its constituents, and its known or suspected hazards.

Dear Mr. Brown:

The Paterson Plank Road PRP Group project in Carlstadt, NJ has been approved to go to HMDC. The ID27 letter has been sent and the material approved. They have asked to do a final inspection of the material before we can bring it in. The reason for this is that too many people tell them a material is one thing and then they get something totally different. Therefore I foresee no reason why this won't run smooth.

I have scheduled a roll off drop for the 19<sup>th</sup>. If this changes please let me know as soon as possible. If you require more than one roll off, please let me know this as well.

If you have any questions or I may be of further assistance please call.

Sincerely

Re: Confirmation Number 4508175

Special Conditions:

- Only waste represented by analytical designated as BG-01B approved under this profile.
- Waste profile sheet numbers must appear on manifest.
- No demurrage will be paid by CWM Chemical Services, Inc., for delays at Model City for on-site acceptance procedures when generator/customer arranges their own transportation.
- Customers who require Certificates of Disposal should place the phrase "Certificate of Disposal Required" in Section 15 of the manifest.
- Special Land Disposal Notification and Certification Form must be properly executed and accompany first shipment of this waste.
- For all loads for stabilization, the first load of the month will be held for testing prior to landfill.
- New York State Department of Environmental Conservation (NYSDEC) approved for 50 tons as an event.

Applicable state and local taxes are not included in these disposal prices. All wastes are priced as profilled, invoiced as actually received. Invoices shall be paid no later than thirty (30) days from the date of receipt. All terms are governed by the Agreement previously executed between our companies. The prices quoted above are subject to change by CWM upon thirty (30) days' prior written notice to you unless otherwise specifically provided or per the terms of our Agreement. If we have not previously concluded a Service Agreement with your company, one is enclosed for your convenience. Please sign and return it to us as soon as possible. Also, if 'Signature on File' does not appear on the signature line of the Waste Profile Sheet, please sign and return it before scheduling your material.

If you have any questions or would like to make changes to the profile, please contact your representative. Thank you for this opportunity to be of service.

Dear Mr. Brown:

Laidlaw Environmental Service has reviewed the revised drum sheets for the Paterson Plank Road Project. All drums, except for the drum containing Sodium Dodecyl Benzene Sulfonate and Trichloro-s-triazinetrione are acceptable. We require the concentration of this material prior to acceptance.

Laidlaw Environmental Services also requests a copy of all paperwork be sent, at least three business days, prior to shipment.

If you have any questions, please do not hesitate to contact me at (301)939-6016.

Sincerely,

Kevin G. Malone  
Solutions Manager

CHRIS BROWN SPKED w/ K. Malone 1/9/98. The material above is a solid not a liquid. K. Malone verbally approved the material and accepted it. However, upon load out, this material must be segregated and packed into its own separate container. Written confirmation of this is forthcoming. SMP 1/9/98.

Attention: RICH BURNS

We are pleased to confirm CWM's approval of your waste material as described below. The attached profile for the waste materials was prepared by CWM based upon information provided by you. It is important that no changes be made to the profile without CWM's consent. If the profile meets with your approval, please call 1- 800-843-3604 to schedule shipment of your waste materials.

CWM Profile Number:

CF7392 MDC

Approved Mgmt. Facility:

CWM MODEL CITY FACILITY  
or another CWM or CWM approved facility

Waste Name:

PCB CONTAMINATED DEBRIS

Disposal Method:

TSCA Landfill.

Disposal Price:

IF MATERIAL IS LIGHT WEIGHT:

\$150.00 PER CUBIC YARD (BASED ON THE RATED  
CAPACITY OF THE CONTAINER)  
- PLUS \$27.00 PER TON TAX  
- PLUS 6% TOWN TAX

OR

IF MATERIAL IS HEAVY:

\$150.00 PER TON (BASED ON A MINIMUM DENSITY OF  
2000 POUNDS PER CUBIC YARD)  
- PLUS \$27.00 PER TON TAX  
- PLUS 6% TOWN TAX

WASTE EVALUATION FEE: WAIVED

Pricing Conditions:

Miscellaneous Charges:

density of 2,000 pounds per cubic yard. Bulk solid waste that falls short of this minimum threshold limit will be billed according to manifested volume in yards, or based upon rated capacity of container.

Profile Expiration Date:

12/08/99

Special Conditions:

- Waste must not contain any free liquid or sludge.
- Waste profile sheet numbers must appear on manifests.
- No demurrage will be paid by CWM Chemical Serv., Inc. for delays at Model City for on-site acceptance procedures when generator/customer arranges their own transportation.
- Customers who require Certificates of Disposal should place the phrase "Certificate of Disposal Required" in Section 15 of the manifest.
- Special Land Disposal Notification and Certification Form must be properly executed and accompany first shipment of this waste.
- Shipment of PCB material must meet the manifest requirements outlined by the USEPA in Federal Register/VOLUME 54, No. 244/Thursday, December 21, 1989.
- New York State Department of Environmental Conservation (NYSDEC) approved for 25 tons as an event.
- Sorbents present in bulk shipments must be non biodegradable and must not have been used as a solidification agent to remove free standing liquid in the load.

Applicable state and local taxes are not included in these disposal prices. All wastes are priced as profiled, invoiced as actually received. Invoices shall be paid no later than thirty (30) days from the date of receipt. All terms are governed by the Agreement previously executed between our companies. The prices quoted above are subject to change by CWM upon thirty (30) days' prior written notice to you unless otherwise specifically provided or per the terms of our Agreement. If we have not previously concluded a Service Agreement with your company, one is enclosed for your convenience. Please sign and return it to us as soon as possible. Also, if 'Signature on File' does not appear on the signature line of the Waste Profile Sheet, please sign and return it before scheduling your material.

## LAND DISPOSAL NOTIFICATION AND CERTIFICATION FORM (LDR)

Generator Name: 216 Paterson Plank Rd Cooperating PRP Group Manifest Doc. No.: F8068

Profile Number: CF7393 SOIL

State Manifest No: NY B 841306 5

1. Is this waste a non-hazardous or hazardous? (See 40 CFR 268.3) Check ONE:  Non-hazardous  Hazardous
2. If this waste is subject to any California List restrictions enter the letter from below (either A, B.1, or B.2) next to each restriction that is applicable:
- SOCS, RCRA, 2014, Metals, Cyanides
3. Identify ALL USEPA hazardous waste codes that apply to this waste shipment, as defined by 40 CFR 261. For each waste code, identify the corresponding subcategory, or check NONE if the waste code has no subcategory. Spent solvent and California List treatment standards are listed on the following page. If P038, multi-source leachate applies those constituents must be listed and attached by the generator. If D001, D002, D003 or D012-D043 requires treatment of the characteristic and meet 268.48 standards, then the underlying hazardous constituent(s) present in the waste must be listed and attached.

To identify P038 or D001, D002, D003 and D012-D043, underlying hazardous constituent(s), use the "7010/Underlying Hazardous Constituent Form" provided (CWM-2004) and check here:

If no VOCs are present in the waste upon its initial generation check here:

To list additional USEPA waste code(s) and subcategory(s), use the supplemental sheet provided (CWM-2005-B) and check here:

HOW MUST THE WASTE BE MANAGED? In column 6 above, enter the letter (A, B1, B2, B3, B4, C, D or E) below that describes how the waste must be managed to comply with the land disposal regulations (40 CFR 268.7). Please understand that if you enter the letter B1, B2, B3, B4 or D, you are making the appropriate certification as provided below. States authorized by EPA to manage the LDR program may have regulatory citations different from the 40 CFR citations listed below. Where these regulatory citations differ, your certification will be deemed to refer to those state citations instead of the 40 CFR citations.

## A. RESTRICTED WASTE REQUIRES TREATMENT

This waste must be treated to the applicable treatment standards set forth in 40 CFR Part 268 Subpart D, 268.32, or RCRA Section 3004(d).

For Hazardous Debris: "This hazardous debris is subject to the alternative treatment standards of 40 CFR Part 268.45."

## B.1 RESTRICTED WASTE TREATED TO PERFORMANCE STANDARDS

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

## B.2 RESTRICTED WASTES FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY (AND THE WASTE HAS BEEN TREATED BY THAT TECHNOLOGY)

"I certify under penalty of the law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

## B.3 1000 PARTS ANALYTICAL CERTIFICATION FOR INCINERATED ORGANICS

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the nonhazardous organic constituents have been treated by incineration in units operated in accordance with 40 CFR Part 268 Subpart O or Part 269 Subpart O, or by combustion in fuel substitution units operating in accordance with applicable technical requirements, and I have been unable to detect the nonhazardous organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

## B.4 DECHARACTERIZED WASTE REQUIRED TREATMENT FOR UNDERLYING HAZARDOUS CONSTITUENTS

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

## C. RESTRICTED WASTE SUBJECT TO A VARIANCE

This waste is subject to a national capacity variance, a treatability variance, or a case-by-case extension. Enter the effective date of prohibition in column 6 above.

For Hazardous Debris: "This hazardous debris is subject to the alternative treatment standards of 40 CFR Part 268.45."

## D. RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

"I have determined that this waste meets all applicable treatment standards set forth in 40 CFR Part 268 Subpart D, and all applicable prohibition levels set forth in Section 268.32 or RCRA Section 3004(d), and therefore, can be land disposed without further treatment. A copy of all applicable treatment standards and specified treatment methods is maintained at the treatment, storage and disposal facility named above." "I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting false certifications, including the possibility of a fine and imprisonment."

## E. WASTE IS NOT CURRENTLY SUBJECT TO PART 268 RESTRICTIONS

This waste is a newly identified waste that is not currently subject to any 40 CFR Part 268 restrictions.

I hereby certify that all information submitted in this and all associated documents is complete and accurate, to the best of my knowledge and information.

State Manifest No: NY B 841304 7

1. Is this waste a non-wastewater or wastewater? (See 40 CFR 268.2) Check ONE:  Nonwastewater  Wastewater
2. If this waste is subject to any California List restrictions enter the letter from below (either A, B, 1, or B.2) next to each restriction that is applicable:  
SOCS, PCBs, Acids, Metals, Cyanides
3. Identify ALL USEPA hazardous waste codes that apply to this waste shipment, as defined by 40 CFR 261. For each waste code, identify the corresponding subcategory, or check NONE if the waste code has no subcategory. Spent solvent and California List treatment standards are listed on the following page. If D039, multi-source leachate applies those constituents must be listed and attached by the generator. If D001, D002, D003 or D012-D043 requires treatment of the characteristic and meet 268.40 standards, then the underlying hazardous constituent(s) present in the waste must be listed and attached.

To identify D039 or D001, D002, D003 and D012-D043, underlying hazardous constituent(s), see the "7339/Underlying Hazardous Constituent Form" provided (CWA-2004) and check here:

If no UHCs are present in the waste upon its initial generation check here:

To list additional USEPA waste code(s) and subcategory(s), use the supplemental sheet provided (CWA-2005-B) and check here:

HOW MUST THE WASTE BE MANAGED? In column 6 above, enter the letter (A, B1, B2, B3, B4, C, D or E) below that describes how the waste must be managed to comply with the land disposal regulations (40 CFR 268.7). Please understand that if you enter the letter B1, B2, B3, B4 or B, you are making the appropriate certification as provided below. (States authorized by EPA to manage the LDR program may have regulatory citations different from the 40 CFR citations listed below. Where these regulatory citations differ, your certification will be deemed to refer to those state citations instead of the 40 CFR citations.)

**A. RESTRICTED WASTE REQUIRES TREATMENT**

This waste must be treated to the applicable treatment standards set forth in 40 CFR Part 268 Subpart D, 268.32, or RCRA Section 3004(d).

For Hazardous Debris: "This hazardous debris is subject to the alternative treatment standards of 40 CFR Part 268.45."

**5.1 RESTRICTED WASTE SUBJECT TO PERFORMANCE STANDARDS**

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

**1.2 RESTRICTED WASTES FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY (AND THE WASTE HAS BEEN TREATED BY THAT TECHNOLOGY)**

"I certify under penalty of the law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

**1.3 0000 FAIRY ANALYTICAL CERTIFICATION FOR INCINERATED ORGANICS**

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR Part 264 Subpart O or Part 265 Subpart O, or by combustion in fuel substitution units operating in accordance with applicable technical requirements, and I have been unable to detect the nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

**1.4 DECHARACTERIZED WASTE REQUIRES TREATMENT FOR UNDERLYING HAZARDOUS CONSTITUENTS**

"I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

**1. RESTRICTED WASTE SUBJECT TO A VARIANCE**

This waste is subject to a national capacity variance, a treatability variance, or a case-by-case extension. Enter the effective date of prohibition in column 6 above.

For Hazardous Debris: "This hazardous debris is subject to the alternative treatment standards of 40 CFR Part 268.45."

**1. RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT**

"I have determined that this waste meets all applicable treatment standards set forth in 40 CFR Part 268 Subpart D, and all applicable prohibition levels set forth in Section 268.32 or RCRA Section 3004(d), and therefore, can be land disposed without further treatment. A copy of all applicable treatment standards and specified treatment methods is maintained at the treatment, storage and disposal facility named above." "I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting false certifications, including the possibility of a fine and imprisonment."

**1. WASTE IS NOT CURRENTLY SUBJECT TO PART 268 RESTRICTIONS**

This waste is a newly identified waste that is not currently subject to any 40 CFR Part 268 restrictions.

I hereby certify that all information submitted in this and all associated documents is complete and accurate, to the best of my knowledge and information.

Certification - Waste Meets Treatment Standards

I am the generator of the waste as identified above, that is restricted under 6 NYCRR Part 376. I have determined that this waste meets all applicable treatment standards set forth in 6 NYCRR Part 376 and, therefore, it can be land disposed without further treatment.

I certify under penalty of law that I personally have examined and am familiar with the waste, through analysis and testing or through knowledge of the waste, to support this certification that the waste complies with the treatment standards specified in Part 376, Section 376.4 and all applicable prohibitions set forth in subdivision 376.3(b) of Part 376 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine or imprisonment.

Notification - Waste Does Not Meet Treatment Standards

I am the generator of a waste restricted under 6 NYCRR Part 376 as identified above. I notify that I personally have examined and am familiar with the waste, through analysis and testing or through knowledge of the waste, to support this notification that the waste does not comply with the treatment standards specified in 6 NYCRR Part 376.4(f). This waste must be treated to the applicable standard set forth in 6 NYCRR Part 376.4(f) prior to land disposal.

Gentlemen:

On behalf of the 216 Paterson Plank Road Cooperating PRP Group (Group), we confirm receipt of your Memorandum of Documentation and Approval Request for Disposal of Site Trash (Memo) dated February 2, 1998 (copy attached).

Based upon the documentation provided in the Memo, and our understanding that the roll-off box does not contain soil or waste material that could potentially be hazardous, the Group concurs with the proposed disposal.

In accordance to your request, OHM Remediation Services Corp. (OHM) respectfully requests approval to dispose of a 13 cubic yard roll-off box of miscellaneous trash and debris generated during Phase Four operations at the 216 Paterson Plank Road Site.

The following is a rough itemization of the contents of the roll-off:

|  |                                 |
|--|---------------------------------|
| Board Lumber and broken wood pallets                 | - 50% (Approximation of Volume) |
| Cardboard boxes and rubbish                          | - 25%                           |
| Unused plastic hose and geosynthetic material scraps | - 25%                           |

The contents of this roll-off is being transported by K&J Carting Company and will be taken to a Bergen County Transfer Station (i.e. the Allegro Recycling Co. of Secaucus, NJ) for ultimate disposal to a Subtitle D non-hazardous landfill.

Approval for the disposal of this roll-off is requested as soon as possible since the box is currently filled to capacity and occupies an area inside of the main gate. Our plan is to dispose of this debris tomorrow morning. Please send your approval to me. If you have any additional questions, please call me at (201) 935-6896.

RE: 216 PATERSON PLANK ROAD SUPERFUND SITE,  
CARLSTADT, NEW JERSEY  
BLOCK 124 LOT 2

Dear Mr. Frey:

Thank you for your letter dated August 12, 1997 regarding the demolition of a small, unoccupied, dilapidated, cinder block building on the Superfund site located at 216 Paterson Plank Road. As you are aware, this site is being investigated and remediated under the auspices of the U.S. Environmental Protection Agency and the New Jersey Department of Environmental Protection. As part of the work, and with the permission of the site owner (see attached letter), OHM Remediation Services Corporation (OHM) of Trenton, NJ, will be demolishing the superstructure of the building beginning February 16, 1998. The project will not involve any new construction.

Although, under the Superfund law, a building or other permit is not required for the conduct of this work (42 USC 9621(e) and 40 CFR 300.400(e)(1), see attached) please be assured that OHM will comply with all substantive local, state and federal requirements. In order to comply with substantive local requirements, we are supplying you with the following information:

1. Completed permit application.
2. Disconnection letter from PSE&G related to gas and electric services.
3. Disconnection letter from United Water.
4. Pest Control letter from Terminix.
5. Contractor's letter confirming that asbestos will not be disturbed.

The building is not tied into the Carlstadt Sanitary Sewer.

Since a formal permit is not required for this work, we have not enclosed the permit fee.

101942

If you have any questions related to this matter, please do not hesitate to call me on (609) 273-1110 or USEPA's Project Manager, Mr. Jon Gorin on (212) 637-4361.

Very truly yours,

Re: 216 Paterson Plank Road, Carlstadt, New Jersey, NPL Site

Dear Bill:

Greg Coffey has referred your recent letter to me.

Obviously, Inmar Associates has not objection to the destruction of the building located on the Carlstadt site.

Thank you for your attention to this matter.

Very truly yours,

States. Upon obtaining such information, the OSC shall conduct an evaluation of the threat posed, based on the OSC's experience in assessing other discharges, and consultation with senior lead agency officials and readily available authorities on issues outside the OSC's technical expertise.

(b) If the investigation by the OSC shows that the discharge poses or may present a substantial threat to public health or welfare of the United States, the OSC shall direct all federal, state, or private actions to remove the discharge or to mitigate or prevent the threat of such a discharge, as appropriate. In directing the response in such cases, the OSC may act without regard to any other provision of law governing contracting procedures or employment of personnel by the federal government to:

(1) Remove or arrange for the removal of the discharge;

(2) Mitigate or prevent the substantial threat of the discharge; and

(3) Remove and, if necessary, destroy a vessel discharging, or threatening to discharge, by whatever means are available.

(c) In the case of a substantial threat to public health or welfare of the United States, the OSC shall:

(1) Assess opportunities for the use of various special teams and other assistance described in §300.145, including the use of the services of the NSFCC, as appropriate;

(2) Request immediate activation of the RRT; and

(3) Take whatever additional response actions are deemed appropriate, including, but not limited to, implementation of the ACP as required by section 311(j)(4) of the CWA or relevant tank vessel or facility response plan required by section 311(j)(5) of the CWA. When requested by the OSC, the lead agency or RRT shall dispatch appropriate personnel to the scene of the discharge to assist the OSC. This assistance may include technical support in the agency's areas of expertise and disseminating information to the public. The lead agency shall ensure that a contracting officer is available on scene, at the request of the OSC.

#### §300.323 Spills of national significance

(a) A discharge may be classified as a spill of national significance (SONS) by the Administrator of EPA for discharges occurring in the inland zone and the Commandant of the USCG for discharges occurring in the coastal zone.

(b) For a SONS in the inland zone, the EPA Administrator may name a senior Agency official to assist the OSC in communicating with affected parties and the public and coordinating federal, state, local, and international resources at the national level. This strategic coordination will involve, as appropriate, the NRT, RRT(s), the Governor(s) of affected state(s), and the mayor(s) or other chief executive(s) of local government(s).

(c) For a SONS in the coastal zone, the USCG Commandant may name a National Incident Commander (NIC) who will assume the role of the OSC in communicating with affected parties and the public, and coordinating federal, state, local, and international resources at the national level. This strategic coordination will involve, as appropriate, the NRT, RRT(s), the Governor(s) of affected state(s), and the mayor(s) or other chief executive(s) of local government(s).

#### §300.324 Response to worst case discharges.

(a) If the investigation by the OSC shows that a discharge is a worst case discharge as defined in the ACP, or there is a substantial threat of such a discharge, the OSC shall:

(1) Notify the NSFCC;

(2) Require, where applicable, implementation of the worst case portion of an approved tank vessel or facility response plan required by section 311(j)(5) of the CWA;

(3) Implement the worst case portion of the ACP required by section 311(j)(4) of the CWA; and

(4) Take whatever additional response actions are deemed appropriate.

(b) Under the direction of the OSC, the NSFCC shall coordinate use of private and public personnel and equipment, including strike teams, to remove a worst case discharge and mitigate or prevent a substantial threat of such a discharge.

#### §300.335 Funding.

(a) The OSLTF is available under certain circumstances to fund removal of oil performed under section 311 of the CWA. Those circumstances and the procedures for accessing the OSLTF are described in 33 CFR part 136. The responsible party is liable for costs of federal removal and damages in accordance with section 311(f) of the CWA, section 1002 of the OPA, and other federal laws.

(b) Where the OSC requests assistance from a federal agency, that agency may be reimbursed in accordance with

the provisions of 33 CFR part 136. Specific interagency reimbursement agreements may be used when necessary to ensure that the federal resources will be available for a timely response to a discharge of oil.

(c) Procedures for funding the initiation of natural resource damage assessment are covered in 33 CFR part 136.

(d) Response actions other than removal, such as scientific investigations not in support of removal actions or law enforcement, shall be provided by the agency with legal responsibility for those specific actions.

(e) The funding of a response to a discharge from a federally owned, operated, or supervised facility or vessel is the responsibility of the owning, operating, or supervising agency if it is a responsible party.

(f) The following agencies have funds available for certain discharge removal actions:

(1) DOD has two specific sources of funds that may be applicable to an oil discharge under appropriate circumstances. This does not consider military resources that might be made available under specific conditions.

(i) Funds required for removal of a sunken vessel or similar obstruction of navigation are available to the Corps of Engineers through Civil Works Appropriations, Operations and Maintenance, General.

(ii) USN may conduct salvage operations contingent on defense operational commitments, when funded by the requesting agency. Such funding may be requested on a direct cite basis.

(2) Pursuant to Title I of the OPA, the state or states affected by a discharge of oil may act where necessary to remove such discharge. Pursuant to 33 CFR part 136 states may be reimbursed from the OSLTF for the reasonable costs incurred in such a removal.

#### Subpart E—Hazardous Substance Response

[Subpart E revised at 55 FR 8813, March 8, 1990]

##### §300.400 General.

(a) This subpart establishes methods and criteria for determining the appropriate extent of response authorized by CERCLA and CWA section 311(c):

(1) When there is a release of a hazardous substance into the environment; or

(2) When there is a release into the environment of any pollutant or contami-

[Sec. 300.400(a)(2)]

nant that may present an imminent and substantial danger to the public health or welfare of the United States.

[§300.400(a) amended at 59 FR 47416, Sept. 15, 1994]

(b) *Limitations on response.* Unless the lead agency determines that a release constitutes a public health or environmental emergency and no other person with the authority and capability to respond will do so in a timely manner, a removal or remedial action under section 104 of CERCLA shall not be undertaken in response to a release:

(1) Of a naturally occurring substance in its unaltered form, or altered solely through naturally occurring processes or phenomena, from a location where it is naturally found;

(2) From products that are part of the structure of, and result in exposure within, residential buildings or business or community structures; or

(3) Into public or private drinking water supplies due to deterioration of the system through ordinary use.

(c) *Fund-financed action.* In determining the need for and in planning or undertaking Fund-financed action, the lead agency shall, to the extent practicable:

(1) Engage in prompt response;

(2) Provide for state participation in response actions, as described in subpart F of this part;

(3) Conserve Fund monies by encouraging private party response;

(4) Be sensitive to local community concerns;

(5) Consider using treatment technologies;

(6) Involve the Regional Response Team (RRT) in both removal and remedial response actions at appropriate decision-making stages;

(7) Encourage the involvement and sharing of technology by industry and other experts; and

(8) Encourage the involvement of organizations to coordinate responsible party actions, foster site response, and provide technical advice to the public, federal and state governments, and industry.

(d) *Entry and access.*

(1) For purposes of determining the need for response, or choosing or taking a response action, or otherwise enforcing the provisions of CERCLA, EPA, or the appropriate federal agency, and a state or political subdivision operating pursuant to a contract or cooperative agreement under CERCLA section 104(d)(1), has the authority to enter any vessel, facility, establishment or other place, property, or

location described in paragraph (d)(2) of this section and conduct, complete, operate, and maintain any response actions authorized by CERCLA or these regulations.

(2) (i) Under the authorities described in paragraph (d)(1) of this section, EPA, or the appropriate federal agency, and a state or political subdivision operating pursuant to a contract or cooperative agreement under CERCLA section 104(d)(1), may enter:

(A) Any vessel, facility, establishment, or other place or property where any hazardous substance or pollutant or contaminant may be or has been generated, stored, treated, disposed of, or transported from;

(B) Any vessel, facility, establishment, or other place or property from which, or to which, a hazardous substance or pollutant or contaminant has been, or may have been, released or where such release is or may be threatened;

(C) Any vessel, facility, establishment, or other place or property where entry is necessary to determine the need for response or the appropriate response or to effectuate a response action; or

(D) Any vessel, facility, establishment, or other place, property, or location adjacent to those vessels, facilities, establishments, places, or properties described in paragraphs (d)(2)(i)(A), (B), or (C) of this section.

(ii) Once a determination has been made that there is a reasonable basis to believe that there has been or may be a release, EPA, or the appropriate federal agency, and a state or political subdivision operating pursuant to a contract or cooperative agreement under CERCLA section 104(d)(1), is authorized to enter all vessels, facilities, establishments, places, properties, or locations specified in paragraph (d)(2)(i) of this section, at which the release is believed to be, and all other vessels, facilities, establishments, places, properties, or locations identified in paragraph (d)(2)(i) of this section that are related to the response or are necessary to enter in responding to that release.

(3) The lead agency may designate as its representative solely for the purpose of access, among others, one or more potentially responsible parties, including representatives, employees, agents, and contractors of such parties. EPA, or the appropriate federal agency, may exercise the authority contained in section 104(e) of CERCLA to obtain access for its designated representative. A potentially responsible party may only be designated as

a representative of the lead agency where that potentially responsible party has agreed to conduct response activities pursuant to an administrative order or consent decree.

(4) (i) If consent is not granted under the authorities described in paragraph (d)(1) of this section, or if consent is conditioned in any manner, EPA, or the appropriate federal agency, may issue an order pursuant to section 104(e)(5) of CERCLA directing compliance with the request for access made under §300.400(d)(1). EPA or the appropriate federal agency may ask the Attorney General to commence a civil action to compel compliance with either a request for access or an order directing compliance.

(ii) EPA reserves the right to proceed, where appropriate, under applicable authority other than CERCLA section 104(e).

(iii) The administrative order may direct compliance with a request to enter or inspect any vessel, facility, establishment, place, property, or location described in paragraph (d)(2) of this section.

(iv) Each order shall contain:

(A) A determination by EPA, or the appropriate federal agency, that it is reasonable to believe that there may be or has been a release or threat of a release of a hazardous substance or pollutant or contaminant and a statement of the facts upon which the determination is based;

(B) A description, in light of CERCLA response authorities, of the purpose and estimated scope and duration of the entry, including a description of the specific anticipated activities to be conducted pursuant to the order;

(C) A provision advising the person who failed to consent that an officer or employee of the agency that issued the order will be available to confer with respondent prior to effective date of the order; and

(D) A provision advising the person who failed to consent that a court may impose a penalty of up to \$25,000 per day for unreasonable failure to comply with the order.

(v) Orders shall be served upon the person or responsible party who failed to consent prior to their effective date. Force shall not be used to compel compliance with an order.

(vi) Orders may not be issued for any criminal investigations.

(e) *Permit requirements.*

(1) No federal, state, or local permits are required for on-site response actions

[Sec. 300.400(e)(1)]

conducted pursuant to CERCLA sections 104, 106, 120, 121, or 122. The term *on-site* means the areal extent of contamination and all suitable areas in very close proximity to the contamination necessary for implementation of the response action.

(2) Permits, if required, shall be obtained for all response activities conducted off-site.

(f) *Health assessments.* Health assessments shall be performed by ATSDR at facilities on or proposed to be listed on the NPL and may be performed at other releases or facilities in response to petitions made to ATSDR. Where available, these health assessments may be used by the lead agency to assist in determining whether response actions should be taken and/or to identify the need for additional studies to assist in the assessment of potential human health effects associated with releases or potential releases of hazardous substances.

(g) *Identification of applicable or relevant and appropriate requirements.*

(1) The lead and support agencies shall identify requirements applicable to the release or remedial action contemplated based upon an objective determination of whether the requirement specifically addresses a hazardous substance, pollutant, contaminant, remedial action, location, or other circumstance found at a CERCLA site.

(2) If, based upon paragraph (g)(1) of this section, it is determined that a requirement is not applicable to a specific release, the requirement may still be relevant and appropriate to the circumstances of the release. In evaluating relevance and appropriateness, the factors in paragraphs (g)(2)(i) through (viii) of this section shall be examined, where pertinent, to determine whether a requirement addresses problems or situations sufficiently similar to the circumstances of the release or remedial action contemplated, and whether the requirement is well-suited to the site, and therefore is both relevant and appropriate. The pertinence of each of the following factors will depend, in part, on whether a requirement addresses a chemical, location, or action. The following comparisons shall be made, where pertinent, to determine relevance and appropriateness:

(i) The purpose of the requirement and the purpose of the CERCLA action;

(ii) The medium regulated or affected by the requirement and the medium contaminated or affected at the CERCLA site;

(iii) The substances regulated by the requirement and the substances found at the CERCLA site;

(iv) The actions or activities regulated by the requirement and the remedial action contemplated at the CERCLA site;

(v) Any variances, waivers, or exemptions of the requirement and their availability for the circumstances at the CERCLA site;

(vi) The type of place regulated and the type of place affected by the release or CERCLA action;

(vii) The type and size of structure or facility regulated and the type and size of structure or facility affected by the release or contemplated by the CERCLA action;

(viii) Any consideration of use or potential use of affected resources in the requirement and the use or potential use of the affected resource at the CERCLA site.

(3) In addition to applicable or relevant and appropriate requirements, the lead and support agencies may, as appropriate, identify other advisories, criteria, or guidance to be considered for a particular release. The "to be considered" (TBC) category consists of advisories, criteria, or guidance that were developed by EPA, other federal agencies, or states that may be useful in developing CERCLA remedies.

(4) Only those state standards that are promulgated, are identified by the state in a timely manner, and are more stringent than federal requirements may be applicable or relevant and appropriate. For purposes of identification and notification of promulgated state standards, the term *promulgated* means that the standards are of general applicability and are legally enforceable.

(5) The lead agency and support agency shall identify their specific requirements that are applicable or relevant and appropriate for a particular site. These agencies shall notify each other, in a timely manner as described in §300.515(d), of the requirements they have determined to be applicable or relevant and appropriate. When identifying a requirement as an ARAR, the lead agency and support agency shall include a citation to the statute or regulation from which the requirement is derived.

(6) Notification of ARARs shall be according to procedures and timeframes specified in §300.515(d)(2) and (h)(2).

(h) *Oversight.* The lead agency may provide oversight for actions taken by potentially responsible parties to ensure that

a response is conducted consistent with this part. The lead agency may also monitor the actions of third parties preauthorized under subpart H of this part. EPA will provide oversight when the response is pursuant to an EPA order or federal consent decree.

(i) *Other.*

(1) This subpart does not establish any preconditions to enforcement action by either the federal or state governments to compel response actions by potentially responsible parties.

(2) While much of this subpart is oriented toward federally funded response actions, this subpart may be used as guidance concerning methods and criteria for response actions by other parties under other funding mechanisms. Except as provided in subpart H of this part, nothing in this part is intended to limit the rights of any person to seek recovery of response costs from responsible parties pursuant to CERCLA section 107.

(3) Activities by the federal and state governments in implementing this subpart are discretionary governmental functions. This subpart does not create in any private party a right to federal response or enforcement action. This subpart does not create any duty of the federal government to take any response action at any particular time.

**§300.405 Discovery or notification.**

(a) A release may be discovered through:

(1) A report submitted in accordance with section 103(a) of CERCLA, i.e., reportable quantities codified at 40 CFR part 302;

(2) A report submitted to EPA in accordance with section 103(c) of CERCLA;

(3) Investigation by government authorities conducted in accordance with section 104(e) of CERCLA or other statutory authority;

(4) Notification of a release by a federal or state permit holder when required by its permit;

(5) Inventory or survey efforts or random or incidental observation reported by government agencies or the public;

(6) Submission of a citizen petition to EPA or the appropriate federal facility requesting a preliminary assessment, in accordance with section 105(d) of CERCLA;

(7) A report submitted in accordance with section 311(b)(5) of the CWA; and

(8) Other sources.
